Its modular design allows for quick and flexible tool changes. In addition to cutting and milling, it also offers V-cutting (miter cuts at five different angles), kiss-cutting (slicing adhesive films), and creasing capabilities.<>Besides contour and end cutting of roll materials such as vinyl adhesive films, roll-up film, canvas, or textile and PVC banners, the G3 Digital Cutter can also process printed or unprinted sheets such as wood, metal, corrugated cardboard, acrylic glass (Plexiglas), Reboard, twin-wall sheets, or plastic sheets. This enables the production of packaging, lettering and signs, as well</p>

as exhibition systems and even furniture. Waste-free production allows for print runs starting from a single unit – ideal for individual pieces, product samples, and prototypes.<>Full description on request
